

Leo Zhang

Dear Brunswick Corporation Hiring Manager,

Full-stack software engineer with 10+ years of experience in Java backend, Android development, AI integration; recently completed MCIS at Auckland University of Technology with First Class Honours, I am drawn to Brunswick Corporation because it focuses on building practical technology that delivers real value. The Senior Software Engineer role aligns well with my background — I have spent the past decade building production systems across backend, mobile, and IoT layers, and I am looking for a team where that breadth creates value rather than just filling tickets.

I have delivered end-to-end features across Android, Java backends, Vue.js dashboards, and IoT gateway firmware — owning the full path from database schema to user interface. This breadth means I can contribute wherever the team needs, without waiting for handoffs.

I would welcome the chance to discuss how my experience can contribute to Brunswick Corporation's engineering team. Thank you for your time and consideration.

Kind regards,

Leo Zhang
